

SHUBHAM MISHRA

SENIOR SOFTWARE DEVELOPER | API & INTEGRATION-FOCUSED FULL-STACK ENGINEER

+91-7985307697 | shubhammishrax@gmail.com | Prayagraj, India | Portfolio: portfolio.opuski.in.com

PROFESSIONAL SUMMARY

Senior Software Developer with 7+ years of experience designing and delivering scalable web applications, RESTful APIs, and enterprise integration solutions across BFSI, Energy, and Life Sciences sectors. Deep expertise in JavaScript/TypeScript, Node.js/Express, API design (Swagger), and data orchestration between enterprise systems (banking core platforms, CRMs, loyalty platforms) and modern cloud applications. Proven client-facing collaborator on enterprise engagements (American Express, Bayer, National Private Banking), translating business requirements into technical solutions and driving process optimization that cut a core workflow from a 26-day to a 1-day SLA. Experienced in AI-assisted development and agentic automation using GitHub Copilot, Cursor, Claude Code, and MCP (Model Context Protocol) servers to build intelligent workflows and accelerate integration delivery. Adept at mentoring junior developers, leading code reviews, and delivering knowledge-transfer sessions to enterprise clients. Comfortable operating across the full delivery lifecycle and quick to ramp up on new platforms, tools, and integration technologies.

TECHNICAL SKILLS

API & Integration: Node.js, Express.js, RESTful API Development, API Design & Documentation (Swagger), Webhooks, OAuth, Token-based Authentication, API Gateway, Data Orchestration

Enterprise Systems: Banking Core Systems (ERP-adjacent), CRM Integration, Loyalty Platform Integration, SaaS Connectors

Frontend: React.js, Angular 17, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap, Microfrontends, Vite

Cloud & Architecture: AWS, Monorepo (pnpm workspaces), Microfrontend Architecture, Middleware Layer, System Interconnectivity

DevOps & Tooling: Jenkins, GitLab, Git, VS Code, IntelliJ IDEA, Sauce Labs, Jira, VersionOne, Microsoft ADO

Testing & Quality: Jest, Jasmine, Karma, SonarQube, ESLint, Unit Testing

AI & Agentic Development: GitHub Copilot, Cursor, Claude Code, MCP (Model Context Protocol), Agentic Workflows, LLM Integration

Accessibility & Domain: ADA Compliance, WCAG 2.1, BFSI (Banking / Wealth Management), Energy, Life Sciences

PROFESSIONAL EXPERIENCE

Senior Software Developer | EPAM Systems

May 2024 – Present

- Lead frontend development for Bayer's Global Loyalty Portal, architecting and delivering a scalable React-based microfrontend ecosystem using Vite, pnpm monorepo, and AWS cloud infrastructure
- Design and implement modular, responsive, and accessible UI components across multiple microfrontends, ensuring seamless integration and consistent user experience
- Orchestrate data flows between the loyalty platform and external SaaS services (third-party reward APIs) using RESTful APIs, webhooks, and OAuth-secured connectors, ensuring data integrity and real-time synchronization
- Build and deploy agentic workflows using MCP (Model Context Protocol) servers to enable intelligent automation, orchestrating AI-driven tasks and decision-making across the loyalty platform
- Leverage AI-assisted development tools (GitHub Copilot, Cursor, Claude Code) to automate boilerplate code generation for API integrations, reduce development cycle time, and improve code quality across the microfrontend ecosystem
- Mentor junior developers through structured code reviews, pair programming sessions, and knowledge-transfer workshops, elevating team code quality and onboarding velocity

- Collaborate directly with product owners, UX designers, and backend teams to translate business requirements into technical solutions and deliver high-quality features on schedule
- Previously led frontend development for American Express digital customer journey modernization, enhancing performance and accessibility across web platforms
- Migrated and refactored legacy UI components to modern React/Angular frameworks, improving performance and maintainability

Senior Project Engineer | Wipro Limited

Nov 2018 – May 2024

- Developed and maintained a wealth management portal for National Private Banking, integrating with banking core systems (ERP-adjacent enterprise platforms) to manage loans, client portfolios, and advisor workflows, reducing a core business process timeline from 26 days to 1-day SLA
- Designed and implemented data orchestration pipelines and ETL workflows to synchronize financial data between the wealth management portal and downstream enterprise systems, ensuring data consistency and compliance
- Implemented ADA compliance and WCAG accessibility standards across all web applications, ensuring an inclusive user experience
- Built responsive, mobile-first web interfaces using React, Angular, TypeScript, and modern CSS frameworks
- Maintained sprint velocity and delivered tasks on time using Agile/Scrum methodology
- Provided innovative solutions and value-adds directly to enterprise clients, improving system efficiency and user satisfaction; conducted knowledge-transfer sessions and trained client teams on portal usage
- Led code review processes and mentored junior engineers, establishing coding standards and best practices across the development team
- Ensured code quality through unit testing, achieving industry-standard code coverage with Jasmine, Karma, and Jest

KEY PROJECTS

Global Loyalty Portal | Bayer | React, TypeScript, Microfrontends, Vite, pnpm Monorepo, AWS, MCP, Agentic Workflows

- Architected a global loyalty portal using a microfrontend approach with Vite build tooling and pnpm workspace monorepo structure
- Deployed and managed cloud infrastructure on AWS, ensuring scalability, security, and high availability for global users
- Integrated the loyalty portal with external SaaS platforms (reward APIs) via RESTful APIs and OAuth-secured connectors, enabling real-time data synchronization
- Designed and implemented agentic workflows using MCP (Model Context Protocol) servers to automate intelligent task orchestration and decision-making across the loyalty platform
- Utilized AI-assisted coding workflows (GitHub Copilot, Cursor) to streamline API integration development, accelerate prototyping, and maintain consistent code patterns across teams

Digital Customer Journey Modernization | American Express | React, TypeScript, Angular

- Modernized customer-facing digital journeys focusing on performance optimization and scalable UI architecture
- Implemented fully functional, responsive, and accessible user interfaces across multiple customer journeys

National Private Banking Development | BFSI Domain | React, Angular, TypeScript, Banking Core Integration

- Built a wealth management portal for managing and processing loans through advisors, bankers, and clients with deep integration into banking core enterprise systems
- Achieved an 88% reduction in business process timeline through efficient workflow optimization and data orchestration between the portal and backend enterprise platforms

- Designed data mapping and transformation pipelines to ensure data integrity across the banking core and the web portal

EDUCATION

Bachelor of Technology, Information Technology

SRM College of Engineering & Management, Lucknow | 2014 – 2018

ACHIEVEMENTS & RECOGNITION

- Received Inspiring Performance Award from Project Manager, Wipro Limited (2019) for excellent performance
- Certificate of Appreciation for creative submission in a personality development course, SRM Institute
- Led the management and sponsorship team for college fests, demonstrating leadership and organizational skills
